Specifications

Max Voltage Rating Continuous:24VDCMax Voltage Rating32VDCMax Total Continuous Current:210

Operating Temp Range: -40°C to +85°C **Ingress Protection:** IP66 & IP67

Mounting Method:M6 bolt and lock washerMounting Hole:2x Ø6.3, 2x Ø6.3x12.2Housing:Black Thermoplastic

Applications

- Overflow Circuits from a Main Power Distribution Module
- Main Power Distribution Module on Small Vehicles
- Accessory Circuits

Features and Benefits

- Compact, 20-cavity hard-wired fuse box fits 10 ATO® blade fuses (sold separately)
- Handles 40A continuous current per circuit and 210 maximum continuous current overall
- Sealed, IP67-rated, waterproof fuse holder can be installed virtually anywhere on a vehicle and stands up to road splash and salt spray
- Dovetail slots on the sides make it a modular fuse box that can be connected to other fuse holders to easily expand circuit protection capacity
- Wires plug into the back of the unit using industrystandard Tyco sealed power terminals, making the fuse box easy to connect
- Terminal position assurance (TPA) locks help prevent disconnection of wires due to vibration and accidental snagging
